EXPERIENCE

Frontend Developer (Remote)
DigLit

March 2021
Toronto ON

- Worked in a team to build and test various components of the client's project.
- **Stack Used:** ReactJS, NextJS, Redux Toolkit, Jest with React-testing-library and Cypress
- Worked with Agile methodologies, on top of GitFlow for maximum team efficiency

- Created responsive react components with CSS Grid and FlexBox for customer accessibility and satisfaction
- Written clean, non-repeated code so it is easier to understand for fellow team members
- Created and implemented test use-cases in TDD style for maximum confidence against modifications.

Projects

L'fa Ticket Tracking System
Code, Preview

Nov 2020 - Dec 2020
Windsor ON

- A system that helps you manage and track bugs in software like Jira
- **Stack**: ReactJS, ExpressJS, NodeJS, Jest, Material-UI, Typescript, Postgresql
- **Features includes**: Authentication, Authorization, Session Management File Upload

- Designed complete architecture (inspired by plugin architecture) for maximum flexibility
- Independent of 3rd party APIs or Databases so you can change them as per clients requests
- Created a REST API to render business logic services to User-Interface

Thumpair.tk
Code, Preview

Jan 2021 - Feb 2021
Brampton ON

- An app that lets you upload a thumbnail and view it in YouTube grid and compare it with your competition so you stand out
- **Stack**: ReactJS, NodeJS, Material-UI

- **Features includes**: File Upload, Making API calls from YouTube search API
- Worked with Google developer's console
- Established a system of analytics collection
